Versatile colour options
12 preferred colours and 6 decor surfaces offer a wide range of colour options

* With up to 30 % better thermal insulation compared with a conventional multi-purpose/security door

For new construction and modernisation

Quality steel doors

Hörmann has the right door for all areas in your home: for making the entrance to the basement secure, for workshops or hobby rooms, a child's or teenager's bedroom, a converted loft or as a door connecting the garage with the rest of the house.

Multi-purpose doors

A multi-purpose door must withstand a lot over many years. The MZ multi-purpose door is sturdy, highly durable and weather-resistant and has been tried and tested for over forty years. It is ideal for both inside and outside. An MZ Thermo door with thermal break is also available and provides up to 30 % better thermal insulation compared to a conventional multi-purpose door.

Security doors

Hörmann has the right security door for every requirement – with standard security equipment and a door leaf with optional thermal break for top thermal insulation, e.g. as an external door for cellars, outbuildings and garages.

Fire-rated doors

When it comes to fire protection, Hörmann is the expert – to your benefit: for doors in the boiler room or oil tank storage room, but also for the passage from the garage to the house. Your advantage: The fire-rated and security door WAT can be matched perfectly to the internal doors inside your home.

Internal doors

Inexpensive and sturdy ZK internal doors are set apart by many advantageous features and can be used from the basement up to the loft. They are durable, resistant to stains, sturdy and close quietly and easily. They come in almost any colour and are ideal for modernising your home.

Best suited for outbuildings, utility sheds or storage rooms: multi-purpose door MZ

The new KSI Thermo offers excellent thermal insulation and RC 2 security equipment as standard

Germany's best-selling boiler room door: fire-rated door H8-5
